Experiment 11: Home Finder Real Estate Platform

AIM:

To design an online real estate portal for Home Finder to search residential properties by location, type, and budget, with viewing appointment scheduling and agent contact tools..

ALGORITHM:

- Start and display search filters (location, price range, property type).
- Property Listings: Display available houses/apartments with amenities and pricing.
- Schedule Viewing: Provide a form for prospective buyers to book a site visit.
- Agent/Customer Records: Allow admins to store property entries and customer visit logs.
- Stop.
